## AUTO START & AUTO MAINS FAILURE CONTROL MODULES

### FEATURES

The DSE7110 is an Auto Start Control Module and the DSE7120 is an Auto Mains (Utility) Failure Control Module suitable for a wide variety of single, diesel or gas, gen-set applications.

Monitoring speed, frequency, voltage, current, oil pressure, coolant temperature and fuel level, the modules will display warnings, shutdown and engine status information on the back-lit LCD screen and illuminated LEDs.

Both modules offer electronic (CAN) and non-electronic (magnetic pick-up/alternator sensing) engine versions and offer an extensive number of flexible inputs, outputs and advanced engine protections so the system can be easily adapted to suit a wide range of application demands.

Enhanced features include a 4-line icon display.

The modules can be easily configured using the DSE Configuration Suite PC software. Front panel editing is also available.
